

Level 2 Certification VIDEO Candidate Information Packet

Total allotted time for this testing is 6 hours.
1hr for online written and 5hrs for practical

Level 2 Certification: Video

You will be completing the setup of a multi camera production switch package. The system consists of:

- 3 cameras (1-Standard lens setup 1-Sports lens setup & 1-robotic). See diagram for approxament placement.
- There is a need to record both camera 1 & 2 as ISO as well as a single program record.
- There will be need for a separate feed (50" monitor) that will not include any graphics.
- There will be a need to show lower third titles generated from computer running PowerPoint.
- CameraTally & system genlock are expected to be setup
- All cameras must be properly setup and ready for show

You may ask the proctor for any specifics that you might need to complete the setup or for clarification. The proctor is here to observe your abilities in the setup of the given system and will not answer questions that they deem to be knowledge that you should already posses. For instance, they will not explain how to do a specific operation on the switcher.

Level 2 Certification: Video

This is approximately how the testing room is expected to look after the finished setup. As all testing centers are not identical, this layout could vary based on location room dimensions.
